

# GROW GREEN

Community gardens are a visible sign of a commitment to improving green space and community aesthetics. **ReWorks** would like to recognize this commitment by offering a chance for these community gardens to receive free compost. This is a unique opportunity to both enrich the soil and support the practice of composting.

## WHO QUALIFIES:

All community gardens located within Summit County that supply fruits and vegetables as a food source to the surrounding community and meet the following requirements:

- Must have been in existence last year and completed one full growing season
- Must commit to have a working garden in 2017
- Must have garden ready for compost by 3rd week in May
- Cannot be a household/residential garden
- Only 1 submission per garden
- Prior year's winners are not eligible

## HOW TO APPLY:

Each community garden can only apply once and must do so online at [summitreworks.com/growgreen](http://summitreworks.com/growgreen) by May 5, 2017. Be prepared to provide information such as your garden's operation, the benefits you provide to the community, and details of on-site composting.

## GET YOUR COMPOST AND START GROWING:

ReWorks will randomly select five community gardens to receive 8 cubic yards [a truckload] of compost delivered for free to the garden site.

Winners will be selected Tuesday, May 9, 2017, and the winning gardens will be notified by May 12, 2017. Compost provided for this contest was purchased by ReWorks from Paradise Composting Co., an Ohio EPA licensed facility that composts food waste.

For details, contact ReWorks at 330-374-0383.

THANK YOU TO OUR PARTNER
